Do more with next-generation Flow technology

Businesses grow and evolve – so should your MFP. The next generation of HP Flow technology makes that possible. Its cloud-based software provides flexible, customised cloud-connected solutions to optimise your print and scan workflows – today and as they change in the future.

ONE SCAN. MULTIPLE DESTINATIONS.

Sending documents to recipients in multiple destinations with multiple delivery requirements? Not a problem. With HP Flow technology, you can scan once and simply manage your files with the colour touchscreen for customised delivery options for each recipient – email, fax, SharePoint and even print a paper copy.⁴ HP saves you time and does it all in just one scan operation.

CUSTOMISED DIGITAL EDITING OF SCANNED DOCUMENTS

With Flow technology, you can digitally edit and personalise copies of the original using direct manipulation of scanned content at the MFP. Use the 10.1inch colour touchscreen display to edit, mark up, redact and highlight comments for recipients.

FAST DUPLEX SCANNING

Keep pace with demand for digital documentation with fast 240 ipm⁵ duplex scanning and enhanced OCR capabilities. Plus, you can further increase performance with the optional Workflow accelerator card.⁶

SCAN SMARTER. LOAD AND GO.

Flow's auto-sensing technology feature is your silent digital workflow assistant. Smart auto-sensing does it all, from picking the best image quality based on type (text or photo) and paper tone/colour, to detecting two-sided prints and automatic separation of scan jobs. The result: higher productivity and job management accuracy along with professional-looking prints that make your business look good.
