

Secure, simple, cloud-based faxing

HP CloudFAX

What if you could...

- Send and receive faxes online through email, web interface, mobile, scanners and MFPs—no need for fax infrastructure
- Help protect sensitive data with built-in encryption, user authentication, and audit trails
- Support compliance requirements such as HIPAA, ISO 27001, GDPR, and PCI-DSS
- Easily integrate cloud fax into any environment with extensive development resources
- Count on effortless scalability to meet growing needs

The challenge

Organizations that rely on faxing for critical business workflows are frustrated with the costs and inefficiencies of a paper fax infrastructure. Even businesses that use fax server technology have experienced issues integrating digital and paper fax systems. Challenges include:

- Overhead costs of fax machines, phone lines, and servers
- Wasteful use of paper and supplies
- Costs and inefficiencies of paper document storage
- Difficulty meeting privacy and compliance requirements
- Reduced user productivity with paper-based workflows

The solution

HP CloudFAX helps organizations cost-effectively fax at volume to anywhere in the world quickly, reliably, and securely. This high-capacity, reliable cloud fax solution enables transmission and reception of faxes from any internet-connected application, with no installations needed. The solution can be tailored to any organization's needs, without sacrificing security, convenience, or scalability.

HP CloudFAX handles every fragment of information with care, adhering to stringent security and privacy regulations throughout, to enhance your reputation and protect your bottom line.

HP CloudFAX makes faxing as simple as emailing or logging into a web portal to send and receive information, from any desktop or mobile device or email-enabled MFP.

“We have used HP CloudFAX for bulk fax needs for multiple years and have found them to be simpler and more efficient to work with than other fax service providers. Particularly their ability to communicate securely through their API/web service.”

- A satisfied HP CloudFAX customer

HP CloudFAX

INTUITIVE USER EXPERIENCE

Sending a fax should be just like sending an email: simple and intuitive—from all your devices. Route, forward, print, or delete faxes, just like an email. Customize fax headers and cover pages, send fax confirmation emails based upon success or failure, and set automatic retry attempts.

Save time with automated data extraction and indexing, OCR conversion, and compression. Create frictionless, convenient workflow experiences tailor-made for hybrid teams. Expert customer support via phone and email in multiple languages helps to resolve issues quickly.

SECURITY AND COMPLIANCE

Your reputation and your bottom line depend on the respect you demonstrate for your customers' data. HP CloudFAX handles every fragment of information with care, adhering to stringent security and privacy regulations throughout. The solution supports compliance regulations such as HIPAA, ISO 27001, GDPR, and PCI-DSS.

HP CloudFAX PCI Compliant Fax is a premium security service offering the highest level of client data protection with PCI Tier 1 certification. From access to resiliency to disaster recovery, the HP approach to security and compliance is fully comprehensive.

COST SAVINGS

HP CloudFAX significantly reduces the heavy cost burden of analog fax environments. No hardware installation is necessary, far fewer supplies are needed, no additional servers or phone lines are required, and there are no ongoing maintenance costs. This software eliminates redundancies created in your current systems, so you can keep costly work interruptions to a minimum.

Active-active infrastructure, separate infrastructure, private queues, and secure, dedicated servers create foundational stability and security. HP CloudFAX is easy to integrate into any environment or process with extensive capabilities built into a variety of supported API methods.

ROBUST SECURITY

Protect sensitive data with these features:

- TLS encryption for incoming and outgoing faxes
- Authentication via private and public key signatures
- "Delete Fax After Completion" feature
- Hide destination fax number(s)
- Full audit trail of faxes sent and received
- Controlled delivery via servers within geographic boundaries

Better together

Pair HP Intelligent Workflows with other document workflow products for a secure, automated end-to-end solution.

- HP Capture and Route
